Liquidity Ratios measure a company's ability to meet short-term obligations using its current assets. They show how easily cash, receivables, and other near-cash assets can cover upcoming liabilities.

Short-Term Solvency Ratios

All amounts are displayed in USD

Working-Capital Position

Solvency Ratios measure a company’s ability to meet its long-term financial obligations by comparing debt levels with assets, equity, or cash flows. They indicate overall financial stability and long-term sustainability.

Leverage & Capital Structure

All amounts are displayed in USD

At 29.2%, 2023 had the highest Debt Ratio and was 217.46% higher than 2025, which had the lowest Debt Ratio at 9.2%.

2023 had the highest Debt Ratio at 29.2%, followed by 2022, 2024, and 2025.

Across all 4 Year, Debt Ratio ranged from 9.2% to 29.2%.

At 0.54, 2023 had the highest Debt to Equity and was 320.48% higher than 2025, which had the lowest Debt to Equity at 0.13.

2023 had the highest Debt to Equity at 0.54, followed by 2022, 2024, and 2025.

Across all 4 Year, Debt to Equity ranged from 0.13 to 0.54.

At 29.2%, 2023 had the highest Debt to Assets and was 217.46% higher than 2025, which had the lowest Debt to Assets at 9.2%.

2023 had the highest Debt to Assets at 29.2%, followed by 2022, 2024, and 2025.

Across all 4 Year, Debt to Assets ranged from 9.2% to 29.2%.

At 1.86, 2023 had the highest Equity Multiplier and was 32.45% higher than 2025, which had the lowest Equity Multiplier at 1.41.

2023 had the highest Equity Multiplier at 1.86, followed by 2022, 2024, and 2025.

Across all 4 Year, Equity Multiplier ranged from 1.41 to 1.86.

Net Worth & Asset Coverage

At 71.1%, 2025 had the highest Net Worth to Total Assets and was 32.45% higher than 2023, which had the lowest Net Worth to Total Assets at 53.7%.

2025 had the highest Net Worth to Total Assets at 71.1%, followed by 2024, 2022, and 2023.

Across all 4 Year, Net Worth to Total Assets ranged from 53.7% to 71.1%.

At 0.75, 2023 had the highest Debt to Tangible Net Worth and was 435.14% higher than 2025, which had the lowest Debt to Tangible Net Worth at 0.14.

2023 had the highest Debt to Tangible Net Worth at 0.75, followed by 2022, 2024, and 2025.

Across all 4 Year, Debt to Tangible Net Worth ranged from 0.14 to 0.75.

At 2.01, 2023 had the highest Debt to EBITDA and was 1,585.72% higher than 2025, which had the lowest Debt to EBITDA at 0.12.

2023 had the highest Debt to EBITDA at 2.01, followed by 2022, 2024, and 2025.

Across all 4 Year, Debt to EBITDA ranged from 0.12 to 2.01.

Coverage Ratios assess a company’s ability to meet interest and debt payments using earnings or cash flow, indicating its short-term debt repayment capacity.

Interest & Debt Service Coverage

All amounts are displayed in USD

At 341.2, 2025 had the highest Interest Coverage Ratio and was 1,911.95% higher than 2023, which had the lowest Interest Coverage Ratio at 17.0.

2025 had the highest Interest Coverage Ratio at 341.2, followed by 2024, 2022, and 2023.

Across all 4 Year, Interest Coverage Ratio ranged from 17.0 to 341.2.

At 341.2, 2025 had the highest Interest Coverage Ratio and was 1,911.95% higher than 2023, which had the lowest Interest Coverage Ratio at 17.0.

2025 had the highest Interest Coverage Ratio at 341.2, followed by 2024, 2022, and 2023.

Across all 4 Year, Interest Coverage Ratio ranged from 17.0 to 341.2.

Evaluate a company's ability to generate profits from its revenues, assets, and equity, reflecting overall financial performance and shareholder value creation.

Profitability Margins

All amounts are displayed in USD

130.50bn

Revenues

32.64bn

COGS

2025 had the highest Gross Profit Margin at 0.75, followed by 2024, 2022, and 2023.

Across all 4 Year, Gross Profit Margin ranged from 0.57 to 0.75.

97.86bn

Gross Profit

81.45bn

Operating Income

130.50bn

Revenues

At 62.4%, 2025 had the highest Operating Profit Margin and was 201.89% higher than 2023, which had the lowest Operating Profit Margin at 20.7%.

2025 had the highest Operating Profit Margin at 62.4%, followed by 2024, 2022, and 2023.

Across all 4 Year, Operating Profit Margin ranged from 20.7% to 62.4%.

Across all metrics, Operating Profit Margin had the most interesting

86.14bn

EBITDA

130.50bn

Revenues

At 66.0%, 2025 had the highest EBITDA Margin and was 197.44% higher than 2023, which had the lowest EBITDA Margin at 22.2%.

2025 had the highest EBITDA Margin at 66.0%, followed by 2024, 2022, and 2023.

Across all 4 Year, EBITDA Margin ranged from 22.2% to 66.0%.

72.88bn

Net Income

130.50bn

Revenues

At 66.0%, 2025 had the highest Net Profit Margin and was 197.44% higher than 2023, which had the lowest Net Profit Margin at 22.2%.

2025 had the highest Net Profit Margin at 66.0%, followed by 2024, 2022, and 2023.

Across all 4 Year, Net Profit Margin ranged from 22.2% to 66.0%.

Return Efficiency

72.88bn

Net Income

88.66bn

Average Total Assets

At 82.2%, 2025 had the highest Return on Assets (ROA) and was Infinity higher than 2022, which had the lowest Return on Assets (ROA) at 0.0%.

2025 had the highest Return on Assets (ROA) at 82.2%, followed by 2024, 2023, and 2022.

Across all 4 Year, Return on Assets (ROA) ranged from 0.0% to 82.2%.

84.27bn

EBIT

74.33bn

Average Capital Employed

At 113.4%, 2025 had the highest Return on Capital Employed (Core ROCE) and was Infinity higher than 2022, which had the lowest Return on Capital Employed (Core ROCE) at 0.0%.

2025 had the highest Return on Capital Employed (Core ROCE) at 113.4%, followed by 2024, 2023, and 2022.

Across all 4 Year, Return on Capital Employed (Core ROCE) ranged from 0.0% to 113.4%.

72.88bn

Net Income

61.15bn

Average Shareholders' Equity

At 119.2%, 2025 had the highest Return on Average Equity (ROAE) and was Infinity higher than 2022, which had the lowest Return on Average Equity (ROAE) at 0.0%.

2025 had the highest Return on Average Equity (ROAE) at 119.2%, followed by 2024, 2023, and 2022.

Across all 4 Year, Return on Average Equity (ROAE) ranged from 0.0% to 119.2%.

Measure how efficiently a company uses its assets to generate sales, indicating how well management converts investments into revenue.

Asset Turnover Efficiency

All amounts are displayed in USD

At 1.47, 2025 had the highest Total Asset Turnover and was 133.90% higher than 2023, which had the lowest Total Asset Turnover at 0.63.

2025 had the highest Total Asset Turnover at 1.47, followed by 2024 at 1.14 and 2023 at 0.63.

2023 had 0.63 Total Asset Turnover, 2024 had 1.14, and 2025 had 1.47.

At 19.57, 2025 had the highest PPE Turnover and was 206.61% higher than 2023, which had the lowest PPE Turnover at 6.38.

2025 had the highest PPE Turnover at 19.57, followed by 2024 at 12.06 and 2023 at 6.38.

2023 had 6.38 PPE Turnover, 2024 had 12.06, and 2025 had 19.57.

Working Capital Efficiency

At 4.25, 2025 had the highest Inventory Turnover and was 41.99% higher than 2023, which had the lowest Inventory Turnover at 2.99.

2025 had the highest Inventory Turnover at 4.25, followed by 2024 at 3.18 and 2023 at 2.99.

2023 had 2.99 Inventory Turnover, 2024 had 3.18, and 2025 had 4.25.

At 121.96, 2023 had the highest Inventory Days (DIO) and was Infinity higher than 2022, which had the lowest Inventory Days (DIO) at 0.

2023 had the highest Inventory Days (DIO) at 121.96, followed by 2024, 2025, and 2022.

Across all 4 Year, Inventory Days (DIO) ranged from 0 to 121.96.

At 8.81, 2024 had the highest Accounts Receivable (AR) Turnover and was 38.48% higher than 2023, which had the lowest Accounts Receivable (AR) Turnover at 6.36.

2024 had the highest Accounts Receivable (AR) Turnover at 8.81, followed by 2025 at 7.89 and 2023 at 6.36.

2023 had 6.36 Accounts Receivable (AR) Turnover, 2024 had 8.81, and 2025 had 7.89.

At 7.14, 2024 had the highest Accounts Payable (AP) Turnover and was 11.43% higher than 2025, which had the lowest Accounts Payable (AP) Turnover at 6.41.

2024 had the highest Accounts Payable (AP) Turnover at 7.14, followed by 2023 at 6.50 and 2025 at 6.41.

2023 had 6.50 Accounts Payable (AP) Turnover, 2024 had 7.14, and 2025 had 6.41.

Cash Conversion Efficiency

At 123.16, 2023 had the highest Cash Conversion Cycle and was Infinity higher than 2022, which had the lowest Cash Conversion Cycle at 0.

2023 had the highest Cash Conversion Cycle at 123.16, followed by 2024, 2025, and 2022.

Across all 4 Year, Cash Conversion Cycle ranged from 0 to 123.16.

Liquidity Position Review

The Current Ratio has remained well above typical semiconductor SME benchmarks (1.5–3.0), ranging from 11.14 in 2025 to a peak of 15.25 in 2022. This indicates an extremely strong ability to cover short-term obligations, but also suggests potentially excessive working capital tied up in current assets. The Quick Ratio (approximated by excluding inventories) follows a similar high pattern, implying that liquidity is not heavily dependent on inventory sales. The Cash Ratio moved from 1.04 in 2022 to 2.43 in 2024, then dropped to 1.19 in 2025, showing that cash reserves relative to liabilities decreased recently, though still above industry norms (~0.5–1.0).

The spread between Current, Quick, and Cash ratios suggests strong receivables quality and cash management efficiency in earlier years, but the 2025 drop in Cash Ratio could indicate increased reliance on receivables and inventory to meet obligations. Inventory levels rose sharply in 2025, and Inventory Days stayed high (over 100 days), which may tie up capital and slow liquidity. Receivables turnover declined slightly in 2025, and Days Sales Outstanding increased to 64.5 days, pointing to slower collections.

Recommendations: 1) Implement tighter credit policies or incentives for faster receivables collection. 2) Review inventory management to reduce holding periods without impacting production continuity. 3) Rebalance cash reserves to maintain at least 1.5 Cash Ratio for stability. 4) Deploy excess current assets into productive investments or debt reduction. 5) Monitor working capital efficiency quarterly to prevent erosion of liquidity. Risks: Over-reliance on receivables and inventory in 2025, potential cash strain if sales slow, and opportunity cost from idle assets.

About

This Financial Ratios Dashboard provides a clear and structured view of a company's financial health by analyzing data directly from financial statements. It highlights key areas such as profitability, efficiency, liquidity, and solvency, turning complex figures into easy-to-understand visuals and indicators.

The dashboard is designed to support informed decision-making, continuous monitoring, and early detection of risks or opportunities.
